

JAMAL BARHOUM

SENIOR FULL-STACK DEVELOPER | ENGINEERING TEAM LEAD

Phone: 0564324552 Email: jamallazeeez@gmail.com Location: Riyadh, Saudi Arabia

SUMMARY

Senior Full-Stack Developer and Engineering Team Lead with 3+ years of experience designing, building, and shipping production web applications end-to-end — from responsive React.js/Next.js interfaces to Node.js/NestJS APIs and MongoDB/PostgreSQL data layers. Proven track record leading engineering teams, driving Agile delivery, and shipping secure payment integrations (Apple Pay, Tap). Skilled at translating business requirements into scalable, maintainable architecture and mentoring developers to deliver high-quality software across the full stack.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux, Zustand, Context API, HTML5, CSS3, Tailwind CSS, SCSS, Material UI, Bootstrap

Backend: Node.js, Express.js, NestJS, RESTful API Design, Socket.io

Leadership: Team Leadership, Sprint Planning, Mentoring, Cross-Functional Collaboration

Databases: MongoDB, PostgreSQL

Payments & Automation: Apple Pay, Tap Payments, Zoho, Deluge

Tools & Practices: Git, GitHub, Agile/Scrum, Clean Architecture, Code Reviews, Performance Optimization

Design: Responsive Design, Cross-Browser Compatibility, Reusable Component Architecture

PROFESSIONAL EXPERIENCE

Front-End Team Leader

CleanLife Company — Riyadh, Saudi Arabia

Jan 2026 – Present

- Lead full-stack delivery for production applications, directing architecture decisions across Next.js/TypeScript front-ends and Node.js/NestJS backend services
- Own sprint planning, code reviews, and technical direction for the engineering team in an Agile/Scrum environment
- Oversee secure payment integrations (Apple Pay, Tap) and backend automation workflows (Zoho, Deluge)
- Partner with cross-functional teams — backend, product, and design — to deliver scalable applications on schedule
- Mentor developers on clean architecture, API design, and engineering best practices across the stack

Full-Stack Developer

CleanLife Company — Riyadh, Saudi Arabia

Sep 2024 – Jan 2026

- Built and shipped full-stack features spanning Next.js/TypeScript front-ends and RESTful backend services
- Designed reusable UI components and backend integrations that improved team delivery speed
- Implemented and supported end-to-end payment workflows and third-party API integrations
- Automated internal business processes using Zoho and Deluge scripting

Front-End Developer

MAP Company — Riyadh, Saudi Arabia

Apr 2023 – May 2024

- Developed dynamic, data-driven interfaces in React.js integrated with backend REST APIs
- Managed complex application state using Redux across multi-step user flows
- Built responsive, cross-browser layouts with Material UI and Bootstrap
- Collaborated closely with backend engineers and designers to ship production features on schedule

Front-End Developer — Freelance Project

Tri-United Construction Co.

Apr 2023 – May 2024

- Designed and built the company's official website end-to-end, improving digital presence
- Optimized performance and responsiveness across devices
- Managed the full deployment pipeline from development to live release

PROJECTS

JoyJoy — E-Commerce Platform

Built a full single-page application using React and Redux with RESTful API integration, a responsive UI, and a scalable component architecture.

Talaqi — Social Platform

Developed core social features including personal accounts, media sharing, and friend connections.

EDUCATION

Meraki Academy — Full-Stack Development Bootcamp

Jan 2023 – May 2023

400+ hours of project-based training across React, Node.js, MongoDB, and PostgreSQL. Trained in Agile/Scrum workflows and team collaboration.
